

## Turkey's biosafety law causes heavy losses to agri-food chain

According to the new Economic Impact Assessment by British consultant Graham Brookes (PG Economics), Turkey's biosafety law has had a substantial negative economic impact on the food manufacturing and livestock production sectors. Turkey has approved 16 genetically modified soybean and maize plants for feed use and introduced a zero tolerance threshold for the presence of unapproved GMOs. This number stands in stark contrast to the 56 GM crops which are marketed globally for food and animal feed production.
