

Book: How synthetic biology will reinvent nature and ourselves

In the future, genetically modified organisms could be making our medicines, [our fuel](#), our housewares, [our houses](#) — and they could even help us remake ourselves. All that may sound like science-fiction, but the future is already arriving, in the form of the [bioplastic bottle](#) you may be holding in your hand. Harvard geneticist [George Church](#) lays it all out in a new book, [“Regenesis: How Synthetic Biology Will Reinvent Nature and Ourselves,”](#) written with Ed Regis.
