

Opposition to genetic engineering is immoral

There's an old saying that no good deed goes unpunished. That certainly seems to be true for many breakthroughs in genetic engineering. Sentiment and bad science are killing the world's poor.

Activism intended to delay progress toward life-saving products and technologies is irresponsible and despicable. If actions by leaders of nations resulted in such public-health calamities, they would be accused of crimes against humanity. The callousness of the anti-genetic-engineering activists should appall us, and if we fail to oppose these malefactors, we should also be ashamed.
