

Video: What we've learned from the Human Genome Project

The following is an excerpt.

[SciShow](#) is a YouTube channel focused on bringing the public short, interesting videos on science topics. Host Hank Green is a jack of all science trades, but [this video](#) focuses on the Human Genome Project and what we did—and didn't—learn from it. Listen as Hank, in his animated fashion, explains the project's successes and shortcomings.
