

Can a rose catch your cold? Threat of 'killer' viral plant gene is latest anti-GMO rant

The following is an excerpt.

The latest 'greatest danger to ever face humanity' emerged with the publication last month of an obscure, technical study in *GM Crops & Foods*, a prominent biotech journal. The article, ungainly titled "Possible consequences of the overlap between the CaMV 35S promoter regions in plant transformation vectors used and the viral gene VI in transgenic plants," by scientists Nancy Podevin and Patrick du Jardin, has set off a feeding frenzy among the scientifically unwashed.
