

Eating GMO pickles will not turn any body part bald

The GLP apologizes for any confusion caused when we posted the satirical article mentioned below in our Daily Digest without disclaimer. The following is an excerpt.

GMO, Monsanto, biotechnology, Roundup Ready, Bt, glyphosate.

OK, most of the Internet search keywords/buzzwords are there for those who seem to spend far too much time on the Web searching for agricultural biotech “news.”

Now that I hopefully have your attention, [my last blog](#) on GMO pickles causing genital baldness was a joke ... a mockery ... a spoof ... a lampoon. It was maybe a lame attempt at ridiculing the hullabaloo surrounding what the whackos call genetically modified food. Everything we eat is genetically modified for goodness sake!
