

Time to call out the anti-GMO conspiracy theory

The following is an excerpt.

I think the controversy over GMOs represents one of the greatest science communications failures of the past half-century. Millions, possibly billions, of people have come to believe what is essentially a conspiracy theory, generating fear and misunderstanding about a whole class of technologies on an unprecedentedly global scale.

This matters enormously because these technologies – in particular the various uses of molecular biology to enhance plant breeding potential – are clearly some of our most important tools for addressing food security and future environmental change.
