

## Biological secrets of the criminal mind

*The following is an excerpt.*

What is science revealing about the nature of the criminal mind? Adrian Raine, a professor at the university of Pennsylvania, is an expert in the expanding field of “neurocriminology.” He has written [\*The Anatomy of Violence\*](#), a sweeping account of crime’s biological roots, including [genetics](#), neuro-anatomy and environmental toxins like lead. He spoke with Mind Matters editor [Gareth Cook](#).
