

Anti-GMOers in Hawaii rely on steady diet of vicious scare mongering

The Hawaii GMO Justice Coalition is an interesting Facebook page full of the A'ole GMO websites, scare mongering memes, Evict Monsanto stuff, and posts from some very lovely people indeed. They also are quite conflicted as to whether they want a ban of GMOs or to label it. Same goes for most of these groups with schizophrenic tendencies. This page also uses its cover to post some very nice comments towards farmers.
