

## DNA Ahead: tour the science of genetics by playing a board game

DNA Ahead, an educational board-game kit, helps players learn how DNA and advances in DNA science affect nearly every aspect of your life: the foods you eat; medical diagnoses & treatments; choices associated with reproduction; crime detection & courtroom evidence; as well as the availability of DNA-based information about your relationship to other species, your family ancestry, your genetic predispositions to diseases & other traits — and the role of DNA in making you you.
