

Talking Biotech: Introduction, and Sleuth4Health Julee K

This pilot episode is an introduction to the Talking Biotech podcast. Special Guest, Sleuth4Health Julee K. Julee's blog was well recognized for its anti-GMO sentiment. However, after time she made gradual realizations that led her to make science-based decisions, and re-evaluate her stance on biotech. She revisits her journey and provides advice as to how to reach hearts and minds concerned about their food.

Questions are answered from Twitter, and there's an introduction the Amazing Crop History portion of the podcast.
