

Talking Biotech: Talking chemophobia with SciBabe; Kevin Folta answers questions

Today chemophobia rules supreme. From fast-food establishments to farming critics, everyone seems to be an expert, except the experts!

Talking Biotech #19 features The SciBabe, Yvette d'Entremont ([@TheSciBabe](#)). She has experience in the chemical industries and a background in applied toxicology. This is a light-hearted discussion of “toxic”, what it means, and what we really need to worry about.

ound or type unknown

In the second part, Kevin Folta answers your questions, covering Dr. Don Huber, IARC and glyphosate, using his slides for your presentations, and student tracts in science communication.
