

Talking Biotech: 'Clean, Green and Ethical' animal production and farming

Several weeks ago there was a request for Talking Biotech Podcast to interview [Graeme Martin](#), University of Western Australia School of Animal Biology professor. Professor Martin has a long career in animal reproductive livestock, crops and production dovetail: es in supporting broach to animal part of the [Future](#)

Talking Biotech Episode 23

Prof. Graeme Martin
University of Western Australia

The Future Farm 2050 Project

*Clean, Green
and Ethical*

[Farm 2050 Project.](#)

The discussion describes some simple, logical, low-cost techniques to increase crop production with less impact on the environment and in the context of minimal water resources. This was a wonderful interview that jogs out-of-the-traditional thinking to address key issues in farm sustainability going forward.
