

Video: Should we use genetic engineering to rid world of malaria?

Humans now have the power to attack and possibly eliminate one of our deadliest and most ancient enemies with the help of genetic engineering. The question is, should we take the chance? But more importantly, is it unethical not to do so?

The GLP aggregated and excerpted this blog/article to reflect the diversity of news, opinion and analysis. Watch the original video on YouTube: [How To Eradicate One Of Our Deadliest Enemies – Gene Drive & Malaria](#)
