

## Infographic: Track the global spread of the coronavirus

The numbers for COVID-19 cases and deaths are changing rapidly. The following charts only provide an approximation of the current situation. Last updated March 6.

The worldwide spread of COVID-19

Confirmed cases reported from each country so far. Data from cruise ship outbreaks not included.  
Credit: ECDC

Proportion of cases by country

world pie  
not confirmed or type unknown

Total COVID-19 diagnoses and deaths

cumulative cases  
not confirmed or type unknown

The cumulative sum of confirmed cases and deaths reported worldwide since the start of the outbreak in late December. Cases jumped in mid-February when Chinese authorities changed their criteria for recording COVID-19 cases.
