

60% of Americans now say they will get a vaccine. Who are they?

Overall, 60% of Americans say they would definitely or probably get a vaccine for the coronavirus, if one were available today, up from 51% who said this in September. About four-in-ten (39%) say they definitely or probably would not get a coronavirus vaccine, though about half of this group – or 18% of U.S. adults – says it's possible they would decide to get vaccinated once people start getting a vaccine and more information becomes available.

...

The survey sheds light on the complex and interrelated factors that shape intent to get a vaccine for COVID-19, chief among them are:

Personal concern about getting a case of COVID-19 that would require hospitalization. Those most concerned about getting a serious case of the coronavirus indicate a higher likelihood of getting a vaccine.

Personal practices when it comes to other vaccines. Those who say they get a flu shot yearly are much more likely than those who rarely or never do so to say they would get a vaccine for the coronavirus if one were available.

Partisanship plays a role in many of these beliefs and practices. Overall, there's a 19-point gap between the shares of Democrats and those who lean to the Democratic Party (69%) and Republicans and Republican leaners (50%) who currently say they would get vaccinated for the coronavirus.
