# The truth about the COVID vaccines: Everything you need to know about the fastest vaccines ever developed

T he COVID-19 vaccine was developed faster than any other vaccine in history, which has caused some concern to those that might otherwise be open to receiving the vaccine if available.

Learn the facts behind the COVID vaccine in the following visual resource, including a quote from the former US Assistant Surgeon General Jim Lando, MD, MPH, FACPM:

THE TRUTH ABOUT THE
COVID VACCINE

The COVID-19 vaccine was developed faster than any other vaccine in history — This speed has made some people nervous to receive the vaccine

COVID Vaccine
Development Timeline

Vaccines Typically Take 10-15 Years To Develop
Previously the fastest vaccines to be developed were

Mumps
4 YEARS

MUMPS VACCINE

Measles
3 YEARS

MEASLES VACCINE

H1N1
Took **JUST A FEW MONTHS** to develop

H1N1 VACCINE

Built on existing processes and safety data for seasonal flu vaccines

How Was The COVID-19 Vaccine Developed So Quickly?
