Babes Against Biotech: Anti-GMO advocacy group known more for breasts than brains

**Babes Against Biotech** (BAB) was founded by Nomi (a.k.a. Naomi S.) “Kaheaonalani” Carmona a 27 (b. 1985) year old, former California resident “activist and comedian at Planet Earth”, with ties to the Just Label It campaign and Prop 37 groups.

**HISTORY**

The [BAB website](http://babesagainstbiotech.org) was registered via the Domains by Proxy privacy protection service in June 2012 – the rationale for which is suspect given they claim to be an openly registered non-profit business with no need for anonymity linked to their web presence. This suggests another “guiding hand” was likely involved in their start. Overall the site has very low online influence (visibility and visitor rankings) but via social media, particularly their presence on [Facebook](https://www.facebook.com/babesagainstbiotech) and on [Twitter](https://twitter.com/babesagainstbiotech), they are actively engaged in fairly sophisticated SEO techniques and viral marketing.

Much of the BAB content and SEO related activity is promoted and supported by Henry Rowlands, another organic industry and Maharishi-linked activist with ties to [Jeffrey Smith](https://www.foodmatters.com) via Smith’s former boss Maharishi professor John Fagan. Together they have backed anti-crop biotechnology campaigns, written articles excoriating GM and produced and posted activist videos, such as [this youtube posting](https://www.youtube.com/watch?v=XYZ) touting the retracted Seralini rat study.

BAB claims on their website and [Facebook page](https://www.facebook.com/babesagainstbiotech) to be a 501c3 however, their taxpayer ID on donation page claims non-profit (BUT NOT TAX DEDUCTIBLE) status and is listed as: EIN 46-1258784 (Non-Profit but not Tax Deductible). A review of IRS exempt organizations for their EIN and name “Babes against biotech” reveals no exempt organization and no 501c3 (or 501c4 or other) required 990 filings – as such it appears that they are not yet a formally registered and approved 501c3 (as of 4/2013). This doesn’t mean they haven’t applied for 501c3 status; sometimes there is a lag before they hit the online databases). They have a potential conflict in their claims of being a 501c3 tax-exempt organization and their actual donation page which states donations are not tax exempt.

In addition, the mixing and volume of political activity on their sites and social media profiles—and the fact that founder Naomi Carmona is a former local government/political employee—could make this an easy to demonstrate violation of 501c3 tax-exempt activity for a complaint. It’s possible there are also violations of HI laws on lobbying disclosures and use of governmental offices/resources for these activities as there appears to have been overlap between the campaign launch and founder Ms. Carmona’s official local government employment.

BaB has formally register as a non-profit business in Hawaii in October 2012 but that doesn’t convey any formal federal tax-exempt status, it only registers them as a business with the HI Secretary of State which would enable them to get a tax-id # and open a bank account.

**MASTER NAME: BABES AGAINST BIOTECH**
300 Wai Nani Way is a residential condominium complex and unit 2507 is a one room studio offered as a rental vacation apartment.[1]

CAMPAIGNS/ACTIVITIES

The evidence suggests the BAB group is likely tied to primarily to Jeffrey Smith (and thus indirectly to two other anti-GMO advocacy groups, Organic Consumers Association and Center for Food Safety) and probably one of his “projects.” They are playing very lose with their tax status and donation collection, which Smith is similarly known to do. She (and her relative/mother) also has many of the common profile characteristics of a Maharishi-cult follower.

KEY PEOPLE

- **Naomi S. Carmona**, a.k.a. Nomi Kaheaonalani, is the only name formally associated with BaB.

  Founder Naomi S. Carmona appears to have taken the name “Nomi Kaheaonalani” after moving to Hawaii from California. Kaheaonalani means “hidden heavenly body” and much about Ms. Carmona appears hidden. She has several common social media “friends” with Maharishi movement-linked followers. She also has multiple common appearances and links to Jeffrey Smith and a 2006 tie to an alternative health/therapy lobbying initiative with FDA. She was employed as executive secretary to Honolulu councilman Tom Berg who lost his seat in 2012.

  Naomi appears to be related and may be the daughter of Naomi Carmona-Morshead. Carmona-Moreshead is a California-based senior affiliate with the Soroptimist NGO (a group with ties to the Maharishi Mahesh Yogi movement of which Jeffrey Smith is a part) and a manager with Nuskin Enterprises – an alternative health anti-aging natural products/supplements company.
Naomi (Nomi Kaheaonalani) Carmona has no reported educational background or credentials other than claims to have studied organic agriculture under Kimberly Clark. Clark is a commercial organic farm and CSA operator in Waimanalo[2] who is active with an anti-corporate, organic farming alliance in Hawaii[3] and a founding board member with the Hawaii Organic Farming Association.[4]
